Board of European Students of Technology

BEST

BEST, Board of European Students of Technology is a constantly growing non-profit and non-political organisation. Since 1989 we provide communication, co-operation and exchange possibilities for students in the Technical faculties and Universities all over Europe. 74 Local BEST Groups (LBGs) in 29 countries create a well-organised, growing, powerful, young and innovative student network. Over 2000 active members organise more than 100 events per year reaching 500 000 students. Our priority is to offer high quality services for students all over Europe. Thus, we manage to bring all the partners in the "student - company - university" triangle closer.

Complementary Education

Complementary education is the primary service of BEST. Over the whole year, we organise learning, self-development and leisure courses for European students. Participants can get a closer glimpse of the latest achievements in technology and management, learn foreign languages, experience other cultures and visit different countries.

Educational Programme

Through the Education Programme, BEST is involved in facilitating discussions on educational matters and transmitting the results towards decision-making bodies. BEST is thus organising Symposia and BEST Academic and Companies events that strive to improve the quality and the value of education in Europe and include the 3 stakeholders in education: Students, Academics and Companies. As an organisation, BEST is actively involved in several European thematic networks:

- TREE - Teaching and Research in Engineering in Europe
- EIE-Surveyor
- EAN - European Access Network
- EUCEN - European Universities Continuing Education Network
- SPUTNIC
- VM-BASE

Career Support

"BEST Career Centre" is the online service of BEST that connects European internationally minded students of technology with companies. It provides a unique opportunity for students to discover a new exciting future and start an international career, with multinational companies announcing jobs, internships and special projects.

Cooperation Possibilities

With more than 70 academic courses, 10 leisure events, 2 general meetings, 8 workshops, 12 committee meetings, job fairs, case studies, cultural exchanges, training events, regional meetings, there is hardly a weekend during which the BEST world takes a rest. Moreover, these are only the activities at European level. Local BEST Groups also organise events for students of their own universities. Discover the opportunities of cooperating with BEST, and choose the Partnership Level that suits the needs of your company best:

- Corporate Partner (1 year)
- Career Support Partner (1 year)
- Supporter (1 year)
- Project Partner (60 days)

Highly Qualified Students

BEST active members experience communication and networking within different cultures. They improve their knowledge of foreign languages and get trained on a wide variety of soft skills: from project management and strategic planning to teamwork, negotiation and many more. With the appropriate practice they gain a valuable set of transversal competencies as well as long term friendships, connections and extended vision of their future projects.
